

What Is Scrum?

Chapter Quiz

Retake quiz

What is a sprint?

- ☐ It is how Scrum teams communicate the status of their work.

During which Scrum event will the product owner (PO) and stakeholders provide early feedback to the development team?

- Correct**
This is at the end of a sprint, where the team gets early feedback from the PO and stakeholders to ensure the product meets business needs.

How would you describe the increment artifact?

- Correct**
It is a Scrum team's growing body of completed, ready-for-used products.

What is the key responsibility of the product owner (PO) on a Scrum team?

- ☐ managing the development team
- ☐ ensuring the team follows the Scrum framework

How does a team use Scrum artifacts?

- ✔ to keep work moving and share what the team works on
Correct
Scrum is a project framework based on transparency and feedback, so Scrum artifacts are available for everyone to review.

Scrum has been the leading Agile framework for many years. What is one of the reasons for its success?

- ✓ Scrum relies on people with different skills who form a team and create working product increments together.
- Correct**
- A shared purpose and frequent short deadlines create a sense of urgency, which is essential to accomplishing anything.

How would you describe Scrum?

- ✓ It is a commonly used project framework based on Agile.
Correct
Scrum is the most commonly used Agile project framework.
