Transcript Search: note that you can search for terms directly within the course. To search video text, switch to the *Transcripts* tab, then press Cmd/Ctrl + F on your keyboard to run a search within the active transcript.

Term	Definition
adaptation	Changing practices to fix processes that are not helping the work advance toward a goal
agile	A term used to represent all the lightweight frameworks that shared the goals listed in the Agile Manifesto
inspection	Close, continuous reviews of work being done to ensure that a project is moving toward the projected goal
product owner	The sole accountable party for the product the development team is building
Scrum	A simple framework that is focused on doing just enough preparation in just enough time for development work to begin
Scrum master	An individual that manages the Scrum process
Scrum team	Consists of the product owner, Scrum master, and the development team
sprint	A period of time in which the development team is expected to produce a potentially shippable product increment
transparency	The idea that all aspects of a process must be visible to the people doing it
velocity	The past performance of the development team
